SOFFIT

A soffit is the bulkhead between the ceiling and the top of the cabinets. Distance from the floor to the soffit should be at least 84". Allow 1/4" more if you install a 84" tall cabinet. Soffit depth may vary, however normal depth is 13" or 1" deeper than a wall cabinet. Note: Check the soffit height and depth to ensure the cabinets do not extend beyond the existing soffits.

ROOM DETAILS:

Record all measurements in inches

- _____ A: Ceiling Height
- _____ B: Cabinet Height
- ___X___ C: Soffit (depth & height)
- _____ D: Wall Cabinet Height

Measuring Your Space

1. Start by measuring each wall of the room and recording the inside dimensions. Measure at the floor then again in the center of the wall and at the ceiling, this will for accuracy and to ensure square ness.
2. Locate the centerline of the sink and record that onto your drawing, indicate water supply, natural gas supply or 220-volt electric service.
3. Next measure each wall individually recording all critical measurements to include all the obstacles and their location (i.e outlets, switches, lights, cables, heat registers, phone jacks, doors, windows).
4. Measure the height of window sill, height and width of the window and doors and height of ceiling and soffits.— Record this information on the Door, Window and Soffit charts.

Recommended Scale: 1/2" = One Foot

Appliances and Fixtures

Utilize this chart to record the measurements and information concerning your appliances and fixtures. Share this information with your designer to ensure everything will be incorporated into your new kitchen plan.
